

QETTLE **WORKPLACE**

BOILING & FILTERED WATER TAP SOLUTIONS FOR MODERN WORKSPACES

WHAT COULD BE BETTER...

...than instant, boiling water and chilled, filtered drinking water on tap, in your workplace? Oh, and normal hot and cold flows, too.

A QETTLE in the kitchen puts an end to time-consuming tea rounds and makes wasting time around the water cooler a thing of the past.

"It's cost-effective, safe and most importantly, the tap is such a timesaver. Thinking about it, it's been a total revelation."

LINDHAM GREENE PARTNERSHIP

TRUE, BOILING WATER

A QETTLE tap dispenses true, 100°C boiling water. It's not only great for an instant cuppa, but also for co-workers grabbing snacks on the go. You'll only ever use as much boiling water as you need and will be more energy efficient. Best of all, no one need ever lose half an hour to the tea round again.

CHILLED, FILTERED WATER

Forget bulky, expensive water coolers and fill your glass, carafe or water bottle straight from the tap. There's a plentiful flow of chilled, great-tasting water that is free from chlorine, chemicals and other, unpleasant contaminants. Chilled water is dispensed at 3-6°C.

COST-EFFECTIVE

Running a QETTLE tap is energy efficient. A QETTLE with a 7L tank on standby costs less than 25p per 24 hours. And of course, you only ever use the exact amount of water you need.

You'll also save money on bottled water or water cooler rental. And there are savings in people time, too. Drinks are instant. No waiting for the kettle to boil or wasting time at the water cooler.

SAFE & EASY TO USE

QETTLE taps feature two-stage safety. When the safety clip is in place, it is impossible to access the flow of boiling water.

But even with the clip removed, a precise action is still required to activate the boiling water. The handle must be pushed down and back simultaneously.

AFFORDABLE

Our Workplace Rental & Servicing is the easiest, most affordable way to get QETTLE into your organisation.

It costs from just **£91.00** per month + VAT. And this includes a complete tap and system, a chiller unit, twice-yearly servicing and technical support.

You may prefer to purchase your QETTLE outright, and doing this, with servicing, is also an option.

A GREENER WAY TO WORK

There's no doubt that workplace waste is scary. Where vending machines and water coolers are available, a full-time, 9-5 worker can use up to 500 'disposable' cups a year, which aren't recyclable. Installing a QETTLE encourages colleagues to adopt a more environmentally friendly way of working, with less waste and an opportunity to offset your carbon footprint.

RENTAL & SERVICING

A rental and servicing fee is charged per QETTLE, per month. The all-in cost includes the tap with a 7L boiler tank, a chiller, twice-yearly maintenance and technical support.

QETTLE Signature 4 in 1
Buffed stainless steel
£95.00 per month

QETTLE Signature 4 in 1
Brass, black, copper or gunmetal
£100.00 per month

QETTLE Signature Mini 2 in 1
Buffed stainless steel
£91.00 per month

There is a minimum 3 year term for rental and servicing contracts. A one-off site survey and installation fee is charged. All pricing ex VAT.

WHAT'S INCLUDED?

- QETTLE tap/system, 7L boiler tank, chiller unit & workplace installation kit
- Twice-yearly servicing, including replacement filter cartridges and boiler tank deep cleaning.
- Technical support, including spare parts, engineer callouts and/or repairs if required
- QETTLE tap user familiarisation session
- Co-worker discount for personal QETTLE purchases.

PURCHASE & SERVICING

Our purchase and servicing option is perfect if you would prefer to own your QETTLE, outright. Servicing is charged per QETTLE, per month.

The servicing cost includes twice-yearly maintenance and technical support.

QETTLE Servicing Only
£55.00 per month

There is a minimum 1 year term for servicing only contracts. All pricing ex VAT.

WHAT'S INCLUDED?

- Twice-yearly servicing, including replacement filter cartridges and boiler tank deep cleaning.
- Technical support, including spare parts, engineer callouts and/or repairs if required
- QETTLE tap user familiarisation session
- Co-worker discount for personal QETTLE purchases.

BEFORE YOU INSTALL

QETTLE taps have simple, pre-installation requirements. We offer a comprehensive technical advisory service, including site survey, and will support you with your installation from start to finish.

- Min 1.5 bar water pressure (hot & cold)
- Double 13 amp power socket below sink
- Min cupboard width 600mm
- Cupboard ventilation
- A sink is required for all QETTLE taps. Drip trays are not recommended.

FAQS

Q. How much boiling water will I get?

A. Our 7L boiler tanks will provide up to 14 cups of boiling water in one go.

Q. How cold is the chilled water, and how much chilled water will I get?

A. It's 3-6°C and you'll get 1.2L.

Q. How much does it cost to rent a QETTLE tap?

A. Our rental/servicing packages start from £91.00 per month + VAT, which is for a 2 in 1 QETTLE Mini. Most workplace customers choose a QETTLE Signature 4 in 1 tap, which dispenses flows of normal hot and cold water, as well as boiling water and filtered drinking water. A rental/servicing package for this tap/system costs £95.00 per month + VAT.

Q. Is rental the only option? Can we buy our tap?

A. There is a purchase/servicing option.

Q. Do you install the tap?

A. Yes. We'll also carry out a full site survey before installation. If you've already got an instant hot water tap, we'll be able to advise you what work will be involved in its removal and 'making good' prior to fitting your QETTLE tap.

Q. What's essential for a QETTLE installation?

A. You'll need water pressure of at least 1.5 bar on both hot and cold flows – but we'll check this for you.

Q. Is the tap safe?

A. Yes. QETTLE features two-stage safety, a safety clip is included and the spout is insulated.

Q. Is sparkling water available?

A. Not right now; but it is the pipeline.

Q. Do we have to have servicing?

A. It's best to think of a QETTLE as a small appliance – and a hard-working one at that! In addition to the tap, there's a compact boiler tank, a chiller, a filter system and specialist plumbing (e.g. the leak detection device). It's vital these elements are regularly maintained by a qualified engineer, and failure to do so will invalidate the warranty. As well as scheduled maintenance, servicing also provides you with full technical support, covers spare parts/repairs and engineer call outs, should they be needed.

Con't.... You'll also need a double plug socket under the sink, and cupboard space that can accommodate the boiler tank, chiller (if specified) and filter system. All these requirements and more will be checked during the survey.

Q. We don't have mains hot water to our sink. Can we still have a QETTLE?

A. Yes, and even better, the QETTLE will provide a flow of 'normal' hot water, too.
